Career Objective

Aspiring **AI/ML Engineer** with hands-on experience in **model training, deployment, and system integration**. I am skilled in **Python, PyTorch, Hugging Face Transformers, Numpy, and Panda** with a strong foundation in **React Native and backend systems**. Passionate about building **AI-powered applications, deploying ML models locally, and integrating them into real-world systems**. Seeking an opportunity to apply technical expertise in **AI development and integration** to solve practical challenges.

Skills

- **Programming Languages:** Python, JavaScript, PHP, C++
- **ML Frameworks & Libraries:** PyTorch, Hugging Face Transformers, Scikit-learn, TensorFlow (basics), Numpy, Panda
- **Databases:** MySQL, SQLite
- **Tools & Platforms:** Git, XAMPP, SPSS, VS Code, Hugging Face
- **Core Competencies:** Machine Learning, NLP, Model Deployment, API Integration, AI Integration.

Projects

1. Toxicity Detection in User Comments (DistilBERT + PHP + React Native)

- Deployed a **DistilBERT NLP model** for toxicity detection in comments.
- Integrated model into a **React Native app** with a PHP backend and MySQL database.
- Achieved accurate classification of toxic vs. non-toxic comments in real-time.

2. Malware Detection Using ML (CNN, LSTM, XGBoost, Random Forest)

- Conducted a research study comparing **ML and DL models** for malware detection.
- **Hybrid CNN + LSTM model achieved 96.4% accuracy**, outperforming Gradient Boosting.

- Used **SPSS** for statistical validation and comparative performance analysis.

3. AI-Powered System Automation (Local LLM Integration)

- Experimented with **Mistral 7B and Llama 2 models** for **system task automation**.
- Built a Windows prototype for **natural language-driven folder management**.
- Optimized models to **4-bit quantization** for running within **6GB RAM** environments.

Education

Bachelor of Technology in Information Technology
(Graduating May 2026)
SIMATS Engineering, Tamil Nadu, India

Relevant Coursework: Machine Learning, Data Structures, Database Management, Web Development.

Certifications

- Python for Everybody – Coursera
- Machine Learning Specialization (Basic) – Andrew Ng, Coursera
- AWS Cloud Practitioner – Amazon Web Services

Achievements

- Solved **200+ problems** on HackerRank and LeetCode focusing on **DSA + ML challenges**.
- Active member of the **University AI/ML club**, participating in coding contests and hackathons.
